EXPERIENCE

Founding Software Engineer — NexaByte

May 2025 – Present

- Built core SaaS platform (AI voicebot, chatbot, subscriptions, referrals, dashboards) for production use.
- Led frontend/backend architecture; implemented authentication, **RBAC**, and billing for **thousands of users**.
- Worked with founders on **system design**, product roadmap, and B2B SaaS go-to-market.

Freelance Full-Stack Software Engineer

2024 – Present

- Delivered **10+ production SaaS systems** including e-commerce, subscriptions, and marketing automation.
- Deployed cloud infrastructure using **AWS**, **Cloudflare**, **VPS**, **PM2**, and message queues.

PROJECTS

Airline Booking Microservices

GitHub

(Node.js, Express, MySQL, Sequelize, RabbitMQ, JWT, Axios)

- Built a **distributed airline booking platform** with **transactional seat reservations** and **idempotent payment processing**.
- Implemented an **API Gateway** with **JWT authentication**, **RBAC**, **rate limiting**, and reverse-proxy routing.
- Ensured **seat inventory consistency** using **SQL transactions** and **row-level locking** under **high concurrency**.
- Designed **event-driven email notifications** using **RabbitMQ** and Nodemailer.

Enterprise Email Marketing Platform

GitHub

(Express, MongoDB, RabbitMQ, Brevo, React, MUI, Redux)

- Developed a **SaaS platform** for domain-based campaigns, subscriber management, and **template customization**.
- Scaled delivery to **100,000+ users per domain** using **PM2 clustering**, **batching**, and **queue-based sending**.
- Integrated **Brevo with RabbitMQ** for **reliable, parallel bulk email delivery** and tracking.

Movie Discovery App

GitHub

(React, Redux, TMDb API, Axios, Tailwind CSS)

- Built a **responsive web application** with **advanced search**, **filters**, and **pagination** for movie discovery.
- Implemented **global state management** using **Redux** to optimize **UI performance** and favorites handling.
